DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is vague and indefinite. On lines 15 and 17, the phrase “one or more” is unclear because it sets forth non-equivalent alternatives.

Claim 15 is vague and indefinite. On lines 13 and 15, the phrase “one or more” is unclear because it sets forth non-equivalent alternatives.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-5, and 9-15 are rejected under 35 U.S.C. 102(b) as being anticipated by Morita (U.S. Patent Application Publication No. 2001/0054664).

With respect to Claim 1, 3-5, and 9-15, Morita, Figure 11, teaches a tape cartridge 1 comprising a reel 7 on which a tape is wound; a leader pin 5; a case 2,3; a tape access window 10; an elastic member 9 having a free end portion 9c and a proximal portion 9a, and anchoring the leader pin at the pin holding portion by pressing the leader pin by the free end portion; and a supporting portion 23 provided in the case and having one or more anchor ribs 23b and a plurality of holding ribs 23a for reinforcing the front wall portion, the supporting portion

Art Unit: 3654

supporting the proximal portion of the elastic member between the one or more anchor ribs and the holding ribs.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Morita as applied to claims 1, 3-5, and 9-15 above, and further in view of Krabbenhoft et al (U.S. Patent No. 5,209,425).

With respect to Claim 2, Morita is advanced above. Krabbenhoft et al, Figures 1 and 2, teach an inclined wall portion. It would have been obvious to one of ordinary skill in the art to provide Morita with an inclined wall portion, as taught by Krabbenhoft et al for the purpose of allowing the tape drive to have a more direct access to the leader pin.

Allowable Subject Matter

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
